Volume Contents

Number 1. September

1 ***In Vivo* Measurement of Indole-3-acetic Acid Decarboxylation in Aging *Coleus* Petiole Sections**—Thomas Brennan and William P. Jacobs

6 **Metabolism of Carbon and Nitrogen by Soybean Seedlings in Response to Vegetative Apex Removal**—Steven J. Crafts-Brandner, Frederick E. Below, James E. Harper, and Richard H. Hageman

11 **On the Light Dependence of Fatty Acid Synthesis in Spinach Chloroplasts**—Andreas Sauer and Klaus-Peter Heise

16 **Organization of Chlorophyll *a* in the Light-Harvesting Chlorophyll *a/b* Protein Complex as Shown by Circular Dichroism. Liquid Crystal-Like Domains**—Ágnes Faludi-Dániel and László A. Mustárdy

20 **Ultraviolet-Stimulated $KHCO_3$ Efflux from Rose Cells. Regulation of Cytoplasmic pH**—Terence M. Murphy, Gerald B. Matson, and Steven L. Morrison

25 **Environmental Responses of the Post-Lower Illumination CO_2 Burst as Related to Leaf Photorespiration**—H. Max Vines, Zeng-Ping Tu, Allan M. Armitage, Sheng-Shu Chen, and Clanton C. Black, Jr.

31 **Purification and Partial Characterization of a Genetically-Defined Superoxide Dismutase (SOD-1) Associated with Maize Chloroplasts**—James A. Baum, Joel M. Chandlee, and John G. Scandalios

36 **Photosynthetic Membranes of *Porphyridium cruentum*. An Analysis of Chlorophyll-Protein Complexes and Heme-Binding Proteins**—Thomas Redlinger and Elisabeth Gantt

41 **Uptake of L-Ascorbate by Intact Spinach Chloroplasts**—Erwin Beck, Anette Burkert, and Margit Hofmann

46 **Effect of Altering the Root-Zone Temperature on Growth, Translocation, Carbon Exchange Rate, and Leaf Starch Accumulation in the Tomato**—Josh Hurewitz and Harry W. Janes

51 **A Comparison of Pigment-Protein Complexes among Normal, Chlorophyll-Deficient and Senescent Soybean Genotypes**—Kenneth Eskins, Dean Delmastro, and Leland Harris

56 **Differential Light Induction of Nitrate Reductases in Greening and Photobleached Soybean Seedlings**—Genichi Kakefuda, Stanley H. Duke, and Stephen O. Duke

61 **Leaf Starch Metabolism during the Growth of Pepper (*Capsicum annuum*) Plants**—John B. W. Hammond and Kerry S. Burton

66 **Quantitative Measurements of Phosphofructokinase in the Shoot Apical Meristem, Leaf Primordia, and Leaf Tissues of *Dianthus chinensis* L.**—Judith G. Croxdale

71 **Abscisic Acid-Induced Freezing Resistance in Cultured Plant Cells**—Tony H. H. Chen and Lawrence V. Gusta

76 **Role of Roots in Regulating the Growth Rate and Cytokinin Content in Leaves**—Avner Carmi and J. Van Staden

79 **Separation of Monovinyl and Divinyl Protochlorophyllides and Chlorophyllides from Etiolated and Phototransformed Cucumber Cotyledons**—Claire M. Hanamoto and Paul A. Castelfranco

82 **Appearance and Disappearance of Cyanide-Resistant Respiration in *Vigna mungo* Cotyledons during and following Germination of the Axis**—Yukio Morohashi and Hisashi Matsushima

87 **Mode of Action of Plastic Film in Extending Life of Lemon and Bell Pepper Fruits by Alleviation of Water Stress**—Shimshon Ben-Yehoshua, Boris Shapiro, Zev Even Chen, and Susan Lurie

94 **Terpenoid Metabolism in Plastids. Isolation and Biochemical Characteristics of *Capsicum annuum* Chromoplasts**—Bilal Camara, Françoise Bardat, Odette Dogbo, Judy Brangeon, and René Monéger

100 **Short Term Studies of Nitrate Uptake into Barley Plants Using Ion-Specific Electrodes and $^{36}ClO_3^-$. I. Control of Net Uptake by NO_3^- Efflux**—Celia E. Deane-Drummond and Anthony D. M. Glass

105 **Short Term Studies of Nitrate Uptake into Barley Plants Using Ion-Specific Electrodes and $^{36}ClO_3^-$. II. Regulation of NO_3^- Efflux by NH_4^+**—Celia E. Deane-Drummond and Anthony D. M. Glass

111 **Respiration of Gametangia of the Aquatic Phycomycete *Allomyces macrogynus*. Inhibition by Cyanide or Antimycin and Salicylhydroxamic Acid or Propyl Gallate**—Hans Peter Heldt-Hansen, Neil G. Grant and Lauritz W. Olson

118 **Photorespiratory Glycine Metabolism in Corn Leaf Discs**—Laura F. Marek and Cecil R. Stewart

121 **Effect of Pod Removal on Leaf Photosynthesis and Soluble Protein Composition of Field-Grown Soybeans**—Vernon A. Wittenbach

125 **Purification and Characterization of a Soybean Leaf Storage Glycoprotein**—Vernon A. Wittenbach

130 **Indole-3-acetic Acid (IAA) and IAA Conjugates Applied to Bean Stem Sections. IAA Content and the Growth Response**—Krystyna Bialek, Werner J. Meudt, and Jerry D. Cohen

135 **Regulation of Development of Leucine Uptake Activity by Glutamine in the Scutellum of Germinating Barley Grain**—Seija Nyman, Tuomas Sopanen, and Juhani Mikola

142 **Tryptophan Enhancement of Somatic Embryogenesis in Rice**—Sunitha Siriwardana and Murray W. Nabors

147 **Metabolism of Glycolate and Glyoxylate in Intact Spinach Leaf Peroxisomes**—Zheng Liang and Anthony H. C. Huang

153 **Uptake and Distribution of Sodium and Potassium by Corn Seedlings. I. Role of the Mesocotyl in 'Sodium Exclusion'**—Julie G. Johanson and John M. Cheeseman

159 **Uptake and Distribution of Sodium and Potassium by Corn Seedlings. II. Ion Transport within the Mesocotyl**—Julie G. Johanson, John M. Cheeseman, and Carol Enkoji

165 **Asparagine Synthesis in Pea Leaves, and the Occurrence of an Asparagine Synthetase Inhibitor**—Kenneth W. Joy, Robert J. Ireland, and Peter J. Lea

169 **Properties of the Isolated Intact Chloroplast at Cytoplasmic K^+ Concentrations. I. Light-Induced Cation Uptake into Intact Chloroplasts Is Driven by an Electrical Potential Difference**—Barbara Demmig and Hartmut Gimmler

SHORT COMMUNICATIONS

175 **Solubilization of the Starch-Granule-Bound Starch Synthase of Normal Maize Kernels**—Fraser D. Macdonald and Jack Preiss

179 **Phospholipids and Lipid Acyl Hydrolase (Phospholipase) in Leaf Galls (Hymenoptera: Cynipidae of Black Oak [*Quercus robor* L.])**—Margaret H. Bayer
182 **A Transplasmamembrane Electron Transport System in Maize Roots**—Rodolfo Federico and Carlo Emanuele Giartosio
185 **Ozone-Induced Reduction in Quantity of Ribulose-1,5-bisphosphate Carboxylase in Alfalfa Foliage**—Eva J. Pell and N. S. Pearson
188 **Fructose 2,6-Bisphosphate and the Regulation of Pyrophosphate-Dependent Phosphofructokinase Activity in Germinating Pea Seeds**—Min-Xian Wu, Douglas A. Smyth, and Clanton C. Black, Jr.
192 **Photosynthesis, Ribulose-1,5-bisphosphate Carboxylase, Electron Transport, and Ribulose 1,5-Bisphosphate of Virescent and Normal Green Wheat Leaves**—Liliana Tomarchio, Lucio Triolo, and Giorgio DiMarco
195 **Effect of Flooding on Starch Accumulation in Chloroplasts of Sunflower (*Helianthus annuus* L.)**—Robert L. Wample and Ronald W. Davis
199 **Proton Flux and Elongation in Primary Roots of Barley (*Hordeum vulgare* L.)**—Roger A. O'Neill and Tom K. Scott

Number 2. October

203 **Immunocytochemical and Cytochemical Localization of Photosystems I and II**—Kevin C. Vaughn, Elizabeth Vierling, Stephen O. Duke, and Randall S. Alberte
208 **Potassium Transport in Corn Roots. II. The Significance of the Root Periphery**—Leon V. Kochian and William J. Lucas
216 **Exopolygalacturonase from Suspension Cultures of *Marchantia polymorpha*. Its Presence and Involvement in Pectic Polysaccharide Degradation**—Haruyoshi Konno, Yoshiki Yamasaki, and Kenji Katoh
223 **Cytokinins in the Leaves of *Ginkgo biloba*. I. The Complex in Mature Leaves**—Johannes Van Staden, Margaret J. Hutton, and Siegfried E. Drewes
228 **Shikimate Pathway Activity during Shoot Initiation in Tobacco Callus Cultures**—Lynda D. Beaudoin-Eagan and Trevor A. Thorpe
233 **Development of a Radioimmunoassay for the Soybean Phytoalexin Glyceollin I**—Peter Moesta, Michael G. Hahn, and Hans Grisebach
238 **Photosynthesis and Ion Content of Leaves and Isolated Chloroplasts of Salt-Stressed Spinach**—Simon P. Robinson, W. John S. Downton, and Jenny A. Millhouse
243 **Nutritional Control of Regreening and Degreening in Citrus Peel Segments**—Albert Huff
250 **Organization and Function of Chlorophyll in Membranes of Cyanobacteria during Iron Starvation**—James A. Guikema and Louis A. Sherman
257 **Intermediates in the Recycling of 5-Methylthioribose to Methionine in Fruits**—Mosbah M. Kushad, Daryl G. Richardson, and Adolph J. Ferro
262 **Localization of Lipoxygenases 1 and 2 in Germinating Soybean Seeds by an Indirect Immunofluorescence Technique**—Marjan Vernooy-Gerritsen, Adri L. M. Bos, Gerrit A. Veldink, and Johannes F. G. Vliegenthart
268 **Carbonic Anhydrase-Deficient Mutant of *Chlamydomonas reinhardii* Requires Elevated Carbon Dioxide Concentration for Photoautotrophic Growth**—Martin H. Spalding, Robert J. Spreitzer, and William L. Ogren
273 **Reduced Inorganic Carbon Transport in a CO_2-Requiring Mutant of *Chlamydomonas reinhardii***—Martin H. Spalding, Robert J. Spreitzer, and William L. Ogren
277 **Maple Sap Uptake, Exudation, and Pressure Changes Correlated with Freezing Exotherms and Thawing Endotherms**—Melvin T. Tyree
286 **A Rapid Regulatory Response Governing Nodulation in Soybean**—Margaret Pierce and Wolfgang D. Bauer
291 **Effects of Low Concentrations of O_3 on Net Photosynthesis, Dark Respiration, and Chlorophyll Contents in Aging Hybrid Poplar Leaves**—Peter B. Reich
297 **Relationships between Carbon Assimilation, Partitioning, and Export in Leaves of Two Soybean Cultivars**—Gary M. Fader and H. Ronald Koller
304 **Invertase Activity and the Kinetin-Stimulated Enlargement of Detached Radish Cotyledons**—Harold F. Howard and Francis H. Witham
309 **A Calcium-Selective Site in Photosystem II of Spinach Chloroplasts**—Rita Barr, Karen S. Troxel, and Frederick L. Crane
316 **Translocation and Metabolism of Endosperm-Applied [2-^{14}C]Indoleacetic Acid in Etiolated *Avena sativa* L. Seedlings**—David L. Jackson and James A. McWha
324 **Selective Inhibition of Proline Hydroxylation by 3,4-Dehydroproline**—James B. Cooper and Joseph E. Varner
329 **Changes in Photosystem II Account for the Circadian Rhythm in Photosynthesis in *Gonyaulax polyedra***—Goran Samuelsson, Beatrice M. Sweeney, H. Allen Matlick, and Barbara B. Prézelin
332 **Development of Photosynthetic Activity following Anaerobic Germination in Rice-Mimic Grass (*Echinochloa crus-galli* var *oryzicola*)**—Delmar VanderZee and Robert A. Kennedy
340 **Reversible Conjugation of Gibberellins *In Situ* in Maize**—Stewart B. Rood, Richard P. Pharis, and Masaji Koshioka
347 **Phytohormones, *Rhizobium* Mutants, and Nodulation in Legumes. III. Auxin Metabolism in Effective and Ineffective Pea Root Nodules**—Jane Badenoch-Jones, Barry G. Rolfe, and David S. Letham
353 **Light-Harvesting System of the Red Alga *Gracilaria tikvahiae*. I. Biochemical Analyses of Pigment Mutations**—Thomas A. Kursar, John van der Meer, and Randall S. Alberte
361 **Light-Harvesting System of the Red Alga *Gracilaria tikvahiae*. II. Phycobilisome Characteristics of Pigment Mutants**—Thomas A. Kursar, John van der Meer, and Randall S. Alberte
370 **Transport of Purine and Pyrimidine Bases and Nucleosides from Endosperm to Cotyledons in Germinating Castor Bean Seedlings**—Erich Kombrink and Harry Beevers
377 **Ionic Osmoregulation during Salt Adaptation of the Cyanobacterium *Synechococcus* 6311**—Eduardo Blumwald, Rolf J. Mehlhorn, and Lester Packer
381 **Seed Dormancy in Red Rice. III. Response to Nitrite, Nitrate, and Ammonium Ions**—Marc Alan Cohn, Denise L. Butera, and John A. Hughes
385 **Orientation and Integrity of Plasma Membrane Vesicles Obtained from Carrot Protoplasts**—Stephen K. Randall and Albert W. Ruesink
392 **Effect of Temperature on Nitrogenase Functioning in Cowpea Nodules**—Ross M. Rainbird, Craig A. Atkins, and John S. Pate

395 **Endogenous Auxin and Ethylene in *Pellia* (Bryophyta)**—Robert J. Thomas, Marcia A. Harrison, Jane Taylor, and Peter B. Kaufman

398 **Purification and Separation of Plant Gibberellins from Their Precursors and Glucosyl Conjugates**—Masaji Koshioka, Kiyotashi Takeno, Frederick D. Beall, and Richard P. Pharis

407 **Ethylene-Induced Lateral Expansion in Etiolated Pea Stems. Kinetics, Cell Wall Synthesis, and Osmotic Potential**—William Eisinger, Lisa J. Croner, and Lincoln Taiz

413 **Ethylene-Induced Lateral Expansion in Etiolated Pea Stems. The Role of Acid Secretion**—Lincoln Taiz, David L. Rayle, and William Eisinger

418 **Isolation of 'Vacuoplasts' from *Poterioochromonas malhamensis***—Petra Jochem, Klaus-S. Thomson, and Dieter Schwab

422 **Soybean Adaptation to Water Stress at Selected Stages of Growth**—Morris G. Huck, Kuni Ishihara, Curt M. Peterson, and Tadahiro Ushijima

428 **Characterization of Diurnal Changes in Activities of Enzymes Involved in Sucrose Biosynthesis**—Thomas W. Rufty, Jr., Phillip S. Kerr, and Steven C. Huber

434 **Light and Shade Effects on Abscission and ^{14}C-Photoassimilate Partitioning among Reproductive Structures in Soybean**—Josephine C. Heindl and William A. Brun

440 **Comparison of Activities of the Host-Specific Toxin of *Helminthosporium maydis*, Race T, and a Synthetic C_{41} Analog**—Yoshikatsu Suzuki, Stephen J. Danko, J. M. Daly, Y. Kono, Herman W. Knoche, and S. Takeuchi

445 **Analysis of Indole-3-acetic Acid Metabolism in *Zea mays* Using Deuterium Oxide as a Tracer**—William L. Pengelly and Robert S. Bandurski

450 **Abscission: Quantification of Light Control**—Dennis R. Decoteau and Lyle E. Craker

452 **Characterization of Nuclear Mutants of Maize Which Lack the Cytochrome *f/b*-563 Complex**—James G. Metz, Donald Miles, and A. William Rutherford

460 **Lipase in the Lipid Bodies of Corn Scutella during Seedling Growth**—Yon-Hui Lin, Larry T. Wimer, and Anthony H. C. Huang

464 **Factors Which Affect the Amount of Inorganic Phosphate, Phosphorylcholine, and Phosphorylethanolamine in Xylem Exudate of Tomato Plants**—Barry A. Martin and N. E. Tolbert

471 **Differences in the Physical Properties of Native and Partially Degraded Phytochrome as Probed by Their Differential Sensitivity to Permanganate Oxidation**—Orna Baron and Bernard L. Epel

475 **Effects of Soil Flooding on Leaf Gas Exchange of Tomato Plants**—Kent J. Bradford

480 **Involvement of Plant Growth Substances in the Alteration of Leaf Gas Exchange of Flooded Tomato Plants**—Kent J. Bradford

484 **Newly Synthesized mRNA Is Translated during the Initial Imbibition Phase of Germinating Maize Embryo**—Jacques Dommes and Claude Van de Walle

488 **Two Photosynthetic Mechanisms Mediating the Low Photorespiratory State in Submersed Aquatic Angiosperms**—Michael E. Salvucci and George Bowes

497 **A Receptor on Soybean Membranes for a Fungal Elicitor of Phytoalexin Accumulation**—Masaaki Yoshikawa, N. T. Keen, and Ming-Chang Wang

SHORT COMMUNICATIONS

507 **Differential Changes in the Amount of Protein Complexes in the Chloroplast Membrane during Senescence of Oat and Bean Leaves**—Hilla Ben-David, Nathan Nelson, and Shimon Gepstein

511 **Autoanalytical Procedure for the Determination of Allantoin and Allantoic Acid in Soybean Tissue**—Peter van Berkum and Charles Sloger

514 **Relationship between N_2-Fixing Efficiency and Natural ^{15}N Enrichment of Soybean Nodules**—Daniel H. Kohl, Barbara A. Bryan, and Georgia Shearer

517 **^{13}C Nuclear Magnetic Resonance Studies of Crassulacean Acid Metabolism in Intact Leaves of *Kalanchoë tubiflora***—Mark A. Stidham, Donald E. Moreland, and James N. Siedow

521 **Ultrastructural and Chemical Evidence That the Cell Wall of Green Cotton Fiber Is Suberized**—L. Y. Yatsu, Karl E. Espelie, and P. E. Kolattukudy

Number 3. November

525 **Arginine Catabolism in the Cotyledons of Developing and Germinating Pea Seeds**—Hans de Ruiter and Chris Kollöffel

529 **Nonstomatal Inhibition of Net CO_2 Uptake by (±) Abscisic Acid in *Pharbitis nil***—Gabriel Cornic and Emile Miginiac

534 **Simultaneous Measurement of Oxygen Evolution and Chlorophyll Fluorescence from Leaf Pieces**—Thomas J. Delieu and David A. Walker

542 **Simultaneous Measurement of Oscillations in Oxygen Evolution and Chlorophyll *a* Fluorescence in Leaf Pieces**—David A. Walker, Mirta N. Sivak, Roslyn T. Prinsley, and John K. Cheesbrough

550 **Plant Disease and the Regulation of Enzymes Involved in Lignification. Increased Rate of *De Novo* Synthesis of the Three Tobacco *O*-Methyltransferases during the Hypersensitive Response to Infection by Tobacco Mosaic Virus**—Jean Collendavelloo, Michel Legrand, and Bernard Fritig

555 **Variation in Quantum Yield for CO_2 Uptake among C_3 and C_4 Plants**—James Ehleringer and Robert W. Pearcy

560 **Role of *O*-Acetylserine in Hydrogen Sulfide Emission from Pumpkin Leaves in Response to Sulfate**—Heinz Rennenberg

566 **Interaction of Indoleacetic Acid and Gibberellic Acid in the Short-Term Growth Kinetics of Oat Stem Segments**—Paul A. Adams and Michael A. Ross

569 **Analysis of Pea Chloroplast Inner and Outer Envelope Membrane Proteins by Two-Dimensional Gel Electrophoresis and Their Comparison with Stromal Proteins**—Margaret Werner-Washburne, Kenneth Cline, and Kenneth Keegstra

576 **Cell Walls of *Phaseolus vulgaris* Leaves Contain the Azocoll-Digesting Proteinase**—Willem van der Wilden, Johannus H. L. Segers, and Maarten J. Chrispeels

579 **Determination of ^{14}C Distribution in Photosynthetic Serine and Phosphoglycerate from Grape Leaves**—Susanne Brem, Hans Peter Ruffner, and Dora M. Rast

582 **Pathway of Photosynthetic Malate Formation in *Vitis vinifera*, a C_3 Plant**—Hans Peter Ruffner, Susanne Brem, and Dora M. Rast

586 **Isolation and Identification of Plasma Membrane from**

Light-Grown Winter Rye Seedlings (*Secale cereale* L. cv Puma)—Matsuo Uemura and Shizuo Yoshida

598 **Auxin-Induced Ethylene Production as Related to Auxin Metabolism in Leaf Discs of Tobacco and Sugar Beet**—Nehemia Aharoni and Shang Fa Yang

605 **Phase Shift in the Potassium Uptake Rhythm of the Duckweed *Lemna gibba* G3 Caused by an Azide Pulse**—Takao Kondo

609 ***In Situ* Field Measurement of Leaf Water Potential Using Thermocouple Psychrometers**—Michael J. Savage, Herman H. Wiebe, and Alfred Cass

614 **Nature of the Fatty Acid Synthetase Systems in Parenchymal and Epidermal Cells of *Allium porrum* L. Leaves**—Rene Lessire and Paul K. Stumpf

619 **Reduction of *N*-Acetyl Methionine Sulfoxide in Plants**—Juan Sánchez, Basil J. Nikolau, and Paul K. Stumpf

624 **Comparison between a Stable NaCl-Selected *Nicotiana* Cell Line and the Wild Type. K^+, Na^+, and Proline Pools as a Function of Salinity**—Abd-Elrahem A. Watad, Leonora Reinhold, and Henri R. Lerner

630 **Effects of SO_2 and O_3 on Allocation of ^{14}C-Labeled Photosynthate in *Phaseolus vulgaris***—Samuel B. McLaughlin and Ronald K. McConathy

636 **Microsomal Membrane Changes during the Ripening of Apple Fruit**—Susan Lurie and Ruth Ben-Arie

639 **Ribulose Bisphosphate Carboxylase Activity in Anther-Derived Plants of *Saintpaulia ionantha* Wendl. Shag**—Shyamala Bhaskaran, Roberta H. Smith, and John J. Finer

643 **Effects of Salinity on Primary Processes of Photosynthesis in the Red Alga *Porphyra perforata***—Kazuhiko Satoh, Celia M. Smith, and David C. Fork

648 **Analysis of Acetylene Reduction Rates of Soybean Nodules at Low Acetylene Concentrations**—Robert F. Denison, P. Randall Weisz, and Thomas R. Sinclair

652 **Starch Synthesis in Shriveled and Plump Triticale Seeds**—Te May Ching, Chris J. Poklemba, and Robert J. Metzger

658 **Photosynthetic Rate Control in Cotton. Stomatal and Nonstomatal Factors**—Robert B. Hutmacher and Daniel R. Krieg

662 **Photosynthetic Rate Control in Cotton. Photorespiration**—Sidney W. Perry, Daniel R. Krieg, and Robert B. Hutmacher

666 **Further Characterization of Calmodulin from the Monocotyledon Barley (*Hordeum vulgare*)**—Michael Schleicher, Thomas J. Lukas, and D. Martin Watterson

671 **Far-Red Light-Induced Changes in Intracellular Potentials of Spinach Mesophyll Cells. Interaction with Red Light**—Michel Montavon, Benjamin A. Horwitz, and Hubert Greppin

677 **Volumetric Components of Seed Imbibition**—A. Carl Leopold

681 **Inhibition of Photosynthesis by Carbohydrates in Wheat Leaves**—Joaquín Azcón-Bieto

687 **Partial Purification and Characterization of Dihydrodipicolinic Acid Reductase from Maize**—Vijai V. S. Tyagi, Randolph R. Henke, and Walter R. Farkas

692 **Effects of Abscisic Acid and Ethylene on the Gibberellic Acid-Induced Synthesis of α-Amylase by Isolated Wheat Aleurone Layer**—Keith Varty, Barbarin Arreguín L., Miguel Gómez T., Pablo Jaime López T., and Miguel Angel Gómez L.

698 **Release of Calcium from Suspension-Cultured *Glycine max* Cells by Chitosan, Other Polycations, and Polyamines in Relation to Effects on Membrane Permeability**—David H. Young and Heinrich Kauss

703 **Changes in [^{14}C]Atrazine Binding Associated with the Oxidation-Reduction State of the Secondary Quinone Acceptor of Photosystem II**—Paul Jursinic and Alan Stemler

709 **Spinach Leaf Intra and Extra Chloroplast Phosphorylase Activities during Growth**—John B. W. Hammond and Jack Preiss

713 **Studies on Genetic Male-Sterile Soybeans. II. Effect of Nodulation on Photosynthesis and Carbon Partitioning in Leaves**—Steven C. Huber, Richard F. Wilson, and J. W. Burton

718 **C_3 Photosynthesis and Crassulacean Acid Metabolism in a Kansas Rock Outcrop Succulent, *Talinum calycinum* Engelm. (Portulacaceae)**—Craig E. Martin and Aaron Klaas Zee

724 **Iron-Sulfur Centers and Activities of the Photosynthetic Electron Transport Chain in Iron-Deficient Cultures of the Blue-Green Alga *Aphanocapsa***—Gerhard Sandmann and Richard Malkin

729 **Effects of Light and Elevated Atmospheric CO_2 on the Ribulose Bisphosphate Carboxylase Activity and Ribulose Bisphosphate Level of Soybean Leaves**—C. V. Vu, L. H. Allen, Jr., and George Bowes

735 **Photoregulation of Phosphoenolpyruvate Carboxylase in *Salsola soda* L. and Other C_4 Plants**—George Karabourniotis, Yiannis Manetas, and Nikos A. Gavalas

740 **Photosynthetic/Photorespiratory Carbon Metabolism in the C_3-C_4 Intermediate Species, *Moricandia arvensis* and *Panicum milioides***—A. Scott Holaday and Raymond Chollet

746 **Fractionation of Nucleoli from Auxin-Treated Soybean Hypocotyl into Nucleolar Chromatin and Preribosomal Particles**—Yie-Ming Chen, Der-Hwa Huang, Shaw-Fang Lin, Chu-Yung Lin, and Joe L. Key

754 **Polyribosomes from Aging Apple and Cherry Fruit**—Alain Drouet, Claude Nivet, and Claude Hartmann

758 **Does Light Inhibit Ethylene Production in Leaves?**—Pawan K. Bassi and Mary S. Spencer

761 **Quantitative and Qualitative Effects of Phosphorus on Extracts and Exudates and Sudangrass Roots in Relation to Vesicular-Arbuscular Mycorrhiza Formation**—Suzanne M. Schwab, John A. Menge, and Robert T. Leonard

766 ***De Novo* Purine Biosynthesis in Intact Cells of *Cucurbita pepo***—Carol J. Lovatt

773 **Freezing Injury and Root Development in Winter Cereals**—Tony Hwei-Hwang Chen, Lawrence V. Gusta, and D. Brian Fowler

778 **Short and Long Term Effects of Root and Shoot Chilling of Ransom Soybean**—Robert L. Musser, Shirley A. Thomas, and Paul J. Kramer

784 **Bicarbonate/CO_2-Facilitated Conversion of 1-Aminocyclopropane-1-carboxylic Acid to Ethylene in Model Systems and Intact Tissues**—Donald G. McRae, John A. Coker, Raymond L. Legge, and John E. Thompson

791 **Role of Endogenous Plant Growth Regulators in Seed Dormancy of *Avena fatua*. II. Gibberellins**—James D. Metzger

796 **Effects of Thidiazuron on Cytokinin Autonomy and the Metabolism of N^6-(Δ^2-Isopentenyl) [8-^{14}C]Adenosine in Callus Tissues of *Phaseolus lunatus* L.**—Susan C. Capelle, David W. S. Mok, Sandra C. Kirchner, and Machteld C. Mok

803 **Endogenous Gibberellin-Like Substances in Somatic Embryos of Grape (*Vitis vinifera* × *Vitis rupestris*) in Relation to Embryogenesis and the Chilling Require-**

ment for Subsequent Development of Mature Embryos—Kiyotoshi Takeno, Masaji Koshioka, Richard P. Pharis, K. Rajasekaran, and Michael G. Mullins

809 **Ribonucleic Acid and Protein Metabolism in Pea Epicotyls. I. The Aging Process**—Anne M. Schuster and Eric Davies

817 **Ribonucleic Acid and Protein Metabolism in Pea Epicotyls. II. Response to Wounding in Aged Tissue**—Anne M. Schuster and Eric Davies

822 **Ribonucleic Acid and Protein Metabolism in Pea Epicotyls. III. Response to Auxin in Aged Tissue**—Anne Schuster and Eric Davies

828 **Stimulation of H^+ Efflux and Inhibition of Photosynthesis by Esters of Carboxylic Acids**—Donna E. Duhaime and Alan W. Bown

834 **Solutes Contributing to Osmotic Adjustment in Cultured Plant Cells Adapted to Water Stress**—Sangita Handa, Ray A. Bressan, Avtar K. Handa, Nicholas C. Carpita, and Paul M. Hasegawa

844 **Cadmium Uptake Kinetics in Intact Soybean Plants**—Dominic A. Cataldo, Thomas R. Garland, and Raymond E. Wildung

849 **Root Absorption and Transport Behavior of Technetium in Soybean**—Dominic A. Cataldo, Raymond E. Wildung, and Thomas R. Garland

SHORT COMMUNICATIONS

853 **Pyruvate Orthophosphate Dikinase in Wheat Leaves**—Kazuko Aoyagi and James A. Bassham

855 **Light-Induced Production of Singlet Oxygen and Superoxide by the Fungal Toxin, Cercosporin**—Margaret E. Daub and Roger P. Hangarter

858 **Isolation, Purification, and Partial Characterization of Formate Dehydrogenase from Soybean Seed**—Michael P. Farinelli, David W. Fry, and Keith E. Richardson

860 **Oxygen Fixation into Hydroxyproline in Etiolated Maize Seedlings. Verification by Tandem Mass Spectrometry**—George J. Fritz, Dean D. Fetterolf, Richard A. Yost, and Brian D. Andresen

862 **Regulation of ADPGlucose Synthesis in Guard Cells of *Commelina communis***—Nina L. Robinson, Eduardo Zeiger, and Jack Preiss

865 **Proton-Metal Cation Exchange in the Cell Wall of *Nitella flexilis***—Pierre Van Cutsem and Claude Gillet

Number 4. December

869 **A Pathway for Photosynthetic Carbon Flow to Mannitol in Celery Leaves. Activity and Localization of Key Enzymes**—Mary E. Rumpho, Gerald E. Edwards, and Wayne H. Loescher

874 **Gravity-Induced Polar Transport of Calcium across Root Tips of Maize**—June S. Lee, Timothy J. Mulkey, and Michael L. Evans

877 **Translocation of Carbohydrates and Proline in Young Grapefruit Trees at Low Temperatures**—Albert C. Purvis and George Yelenosky

881 **Role of Ethylene in the Senescence of Detached Rice Leaves**—Ching Huei Kao and Shang Fa Yang

886 **Electron Transport-Dependent Chlorophyll-*a* Fluorescence Quenching by O_2 in Various Algae and Higher Plants**—Doug Bruce, William Vidaver, Konrad Colbow, and Radovan Popovic

889 **Evolution of O_2 in Brown Algal Chloroplasts**—Radovan Popovic, Konrad Colbow, William Vidaver, and Doug Bruce

893 **Mechanism of Short Term Fe^{III} Reduction by Roots. Evidence against the Role of Secreted Reductants**—Edward G. Barrett-Lennard, Horst Marschner, and Volker Römheld

899 **Early Events in Maize Seed Development. 1-Methyl-(3-phenyl-5-(3-[trifluoromethyl]phenyl)-4- (1*H*) -Pyridinone Induction of Vivipary**—Franklin Fong, James D. Smith, and Don E. Koehler

902 **ATP-Dependent Proteolytic Activity from Spinach Leaves**—John B. W. Hammond and Jack Preiss

906 **Ribulose Bisphosphate Carboxylase Synthesis in Barley Leaves. A Developmental Approach to the Question of Coordinated Subunit Synthesis**—Helen T. Nivison and C. Ralph Stocking

912 **Are Polyamines Transported in Etiolated Peas?**—Nevin D. Young and Arthur W. Galston

915 **Expression of Zein in Long Term Endosperm Cultures of Maize**—Ko Shimamoto, Marcel Ackermann, and Christa Dierks-Ventling

921 **Separation of Two Types of Electrogenic H^+-Pumping ATPases from Oat Roots**—Kathleen A. Churchill, Barbara Holaway, and Heven Sze

929 **Lipid Biosynthesis in Developing Mustard Seed. Formation of Triacylglycerols from Endogenous and Exogenous Fatty Acids**—Kumar D. Mukherjee

935 **Effect of Water Stress, Seed Coat Restraint, and Abscisic Acid upon Different Germination Capabilities of Two Tomato Lines at Low Temperature**—Albert Liptay and Peter Schopfer

939 **Activity *in Vivo* and Redox States *in Vitro* of Nitro- and Chlorodiphenyl Ether Herbicide Analogs**—Gregory L. Orr, C. Michael Elliott, and Mary Ellen Hogan

945 **Interaction of Benzylaminopurine with Electron Transport in Plant Mitochondria during Malate Oxidation**—Michèle Chauveau, Pierre Dizengremel, and Jean Roussaux

949 **Role of Endoplasmic Reticulum in Biosynthesis of Oat Globulin Precursors**—Khosrow Adeli and Illimar Altosaar

956 **Water Relationships and Incorporation of ^{14}C Assimilates in Tubers of Potato Plants Differing in Potassium Nutrition**—Helmut Beringer, Hans E. Haeder, and Meinolf Lindhauer

961 **Metabolic Relations between Methylxanthines and Methyluric Acids in *Coffea* L.**—Joseph B. Petermann and Thomas W. Baumann

965 **L-Arginine and L-Canavanine Metabolism in Jack Bean, *Canavalia ensiformis* (L.) DC. and Soybean, *Glycine max* (L.) Merr.**—Kelsey R. Downum, Gerald A. Rosenthal, and William S. Cohen

969 **Light Effects in Mycorrhizal Soybeans**—Gabor J. Bethlenfalvay and Raymond S. Pacovsky

973 **Sensitivity of Tonoplast-Bound Adenosine-Triphosphatase from *Hevea* to Inhibitors**—Bernard Marin

978 **Estimation of Photorespiration Based on the Initial Rate of Postillumination CO_2 Release. I. A Nonsteady State Model for Measurement of CO_2 Exchange Transients**—Richard B. Peterson

983 **Estimation of Photorespiration Based on the Initial Rate of Postillumination CO_2 Release. II. Effects of O_2, CO_2, and Temperature**—Richard B. Peterson

989 **Regulation of Spinach Leaf Sucrose Phosphate Synthase by Glucose-6-Phosphate, Inorganic Phosphate, and pH**—Douglas C. Doehlert and Steven C. Huber

995 **Isolation-Inflicted Injury to Mitochondria from Fresh**

Pollen Gradually Overcome by an Active Strengthening during Germination—Folkert A. Hoekstra and Tineke van Roekel

1002 **Photosynthesis and Ribulose 1,5-Bisphosphate Carboxylase in Rice Leaves. Changes in Photosynthesis and Enzymes Involved in Carbon Assimilation from Leaf Development through Senescence**—Amane Makino, Tadahiko Mae, and Koji Ohira

1008 **Purification and Characteristics of an Endogenous α-Amylase Inhibitor from Barley Kernels**—Randall J. Weselake, Alexander W. MacGregor, Robert D. Hill, and Harry W. Duckworth

1013 **Ethylene Production by Auxin-Deprived, Suspension-Cultured Pear Fruit Cells in Response to Auxins, Stress, or Precursor**—Rolf Puschmann and Roger Romani

1020 **Role of Pit Membranes in Macromolecule-Induced Wilt of Plants**—Neal K. Van Alfen, Brent D. McMillan, Victoria Turner, and Wilford M. Hess

1024 **Exogenous NAD^+ Effects on Plant Mitochondria. A Reinvestigation of the Transhydrogenase Hypothesis**—David A. Day, Michel Neuburger, Roland Douce, and Joseph T. Wiskich

1028 **Some Enzymic Activities in the Germinating Oil Palm (*Elaeis guineensis*) Seedling**—Khaik Cheang Oo and Paul K. Stumpf

1033 **The Metabolism of the Germinating Oil Palm (*Elaeis guineensis*) Seedling. *In Vivo* Studies**—Khaik Cheang Oo and Paul K. Stumpf

1038 **Photoreduction of Oxygen in Mesophyll Chloroplasts of C_4 Plants. A Model System for Studying an *in Vivo* Mehler Reaction**—Robert T. Furbank, Murray R. Badger, and C. B. Osmond

1042 **Estimation of the Volumetric Elastic Modulus and Membrane Hydraulic Conductivity of Willow Sieve Tubes**—John P. Wright and Donald B. Fisher

1048 **Purification and Characterization of an Iminopeptidase from the Primary Leaf of Wheat (*Triticum aestivum* L.)**—Stephen P. Waters and Michael J. Dalling

1055 **Sugar-Nucleotide Precursors of Arabinopyranosyl, Arabinofuranosyl, and Xylopyranosyl Residues in Spinach Polysaccharides**—Stephen C. Fry and Don H. Northcote

SHORT COMMUNICATIONS

1062 **No Influence of the Embryonic Axis on the Development of Diamine Oxidase in Pea Cotyledons**—Eiji Hirasawa

1065 **Effect of Water Stress on the Reduction of Nitrate and Nitrite by Soybean Nodules**—Chung-Li Chen and Jih-Min Sung

1067 **Isolation of Mesophyll Protoplasts from Mature Leaves of Soybeans**—Willy Lin
